Rafał Bierzanek

software tester

PROFESSIONAL SUMMARY

Over the past few years, I have moved to the real estate industry, where I went through all possible specialties: property management, real estate appraisal and sales brokerage I made the decision to rearrange 2 years ago and during this period I have had many trainings, webinars, online courses and participated in projects related to training in the IT industry. Analyzing my hard knowledge in the field of IT and knowing my interpersonal communication skills and analytical skills confirmed in the real estate industry, I believe that the choice of the way to a manual tester and in the near future an automation tester is the optimal goal for me.

WORK EXPERIENCES
